Yousef Salman

Full-Stack Developer (.NET Core & React)

Amman, Jordan | +962799882249 | yusefsalman13@gmail.com
LinkedIn | GitHub | Portfolio

Summary

Full-Stack Developer specializing in building secure, scalable web applications and RESTful APIs using **ASP.NET Core** and **React.js**. Experienced in implementing robust database architectures with **PostgreSQL** and **Entity Framework Core**, secure authentication (**JWT**, BCrypt), and state management. Strong foundation in Artificial Intelligence with a focus on writing maintainable, clean code and performance optimization.

Education

Tafila Technical University — Oct 2023 – June 2027
B.Sc. in Artificial Intelligence — *Jordan*

Technical Skills

Backend Development: C#, ASP.NET Core Web API, Entity Framework Core, LINQ, RESTful APIs, JWT Authentication, Identity.
Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Axios, Vite.
Databases & Tools: PostgreSQL, SQL Server, Git & GitHub, Postman.
Core Concepts: Object-Oriented Programming (OOP), Double-Entry Accounting logic, Concurrency Control, Clean Architecture basics.

Featured Projects

NovaPay – FinTech Digital Wallet API | GitHub | Live Demo
Engineered a secure, high-concurrency FinTech digital wallet platform using ASP.NET Core (.NET 10) and PostgreSQL. Enforced financial data integrity through strict double-entry bookkeeping (Ledger Entries) and ACID transactions, while mitigating race conditions and double-spending vulnerabilities via EF Core Concurrency Tokens. Built automated wallet provisioning with unique account generation, implemented secure authentication with JWT and BCrypt, and integrated Stripe API for digital balance top-ups alongside Gemini AI for automated spending insights and financial advice.

LuxeStay – AI-Powered Boutique Hotel Booking Platform | GitHub | Live Demo
Engineered an end-to-end full-stack boutique hotel booking platform using ASP.NET Core (.NET 10), React, TypeScript, and PostgreSQL. Integrated Google Gemini 3.6 Flash via a dynamic AI Concierge to deliver intelligent, context-aware room recommendations based on guest preferences and real-time inventory. Built robust role-based JWT authentication, administrative dashboards for suite management, and deployed the production-ready application seamlessly across Render and Netlify.
